- **10+2** (Non-Medical) from SD Public School, Chandigarh, India.

## Web Projects

### THE FATEH STUDIO

- My portfolio website is built using HTML5, CSS, jQuery and PHP.
- It's a single page website, all the icons and graphics have been created in Photoshop and media queries have been used to make the website responsive.
- Efficient use of custom JavaScript functions for animations.
- Website: [www.thefatehstudio.com](http://www.thefatehstudio.com).

### ADVERTISEMENT PORTAL

- An online advertisement portal similar to Kijiji.
- Built using core PHP. The website offers free user registration and users can view and post advertisements on the website.
- Users are allowed to maintain a personal profile and interact with other users.
- This website also offers Wish List and Ad-Rating features which work on IP tracking principles.
- Although, not designed very well but this project has a huge potential based on its technical aspects.

### KIRKLAND DISTRICT HOSPITAL

- A complete Website redesign and addition of extra user functionality.
- It was a team project built in ASP.NET using C#. I was responsible for building a custom appointment booking system, a CMS for managing blood donors and Google maps integration.
- The redesign also offered complete interface redesign where I was responsible for building the Photoshop mockups and converting them to HTML and CSS.

### FLY TO NASA

- Fly to NASA is a sister concern of Inizio Edutech Pvt Limited.
- This website was built for the company to help them organize a competition where in the winners were given a chance to visit NASA space center, USA.
- A custom PHP CMS was built for the company to manage school and student registrations and a messaging system which helped the admin to communicate with the participants directly.
- The students were allowed to fill in all the details required by the company to fill in Visa forms and upload necessary documents on the website.
- This website was built as part of the Go-Green initiative taken by the company.
